EXPERIENCE

University Training, Damascus— *Technical*

2-Month Training

As an industrial engineering student, I gained expertise in computer-aided design and programming for CNC machines, as well as input and output coding for industrial applications. My training equipped me with the skills to optimize processes and systems, increase productivity, and improve quality. I also gained hands-on experience in various industries through internships and projects

SKILLS

Solid Works, AutoCad

LANGUAGES

Arabic: Native
